If you have an older version installed in your phone already...

BEFORE you delete the old app, click on the second “reset” button to reset LUID, your hashed identifier.

Then follow the instruction below to install the app!
After Clicking on the download link, you will see this web page, Click on Install Application.
After Clicking Install, Press the Home button on your iPhone.
You will see the CATCH the Virus Study Location App on your home screen. If you click on it, you should see the message above.
Go to Setting, then General, then Profiles & Device Management, then UMD, then Trust UMD, then Trust. Now you have successfully installed the app.

UM Single-Signon Service

Login Now!

Click here for information on using this service with your application.

If you have problems with this page, please contact the IT Service Desk at 301-405-1500.

Logging In

Upon opening the app you will see the seen above, link on Login Now! to register.

(You will only need to do this once.)
Creating a hashed identifier

Enter your name, UID and birthday to create a hashed identifier for you. Your data will be destroyed and will not be stored on the phone. Press “Done” TWICE to continue.
Consent Form

Read the entire consent Form, then hit the “I Agree” button to sign the Consent Form.
Email Consent Form

Once you enter your email address, we will send you a copy of the consent form you signed.
Last Step

Click “Always Allow” and you are all set.
Pause Sharing Location Data

You can pause sharing your location data by turning off the “Enable Location Sharing” button, or using snooze sharing for a period of time so you would not forget to turn it back on.
Keep Track of Your Points

Make sure to reset (click on the first reset button!!) your data point counter when you first start the app if it is not 0 to better keep track of the data points you’ve contributed.
University of Maryland College Park

Project Title
Contagious Phenotypes of Acute Respiratory Infection: Identification, Characterization, and Biomarkers (Characterizing And Tracking College Health (CATCH) – the Virus Study)

Purpose of the Study
This research is being conducted by Donald Milton, MD, DrPH, and a team of researchers at the University of Maryland with funding from the U.S. Defense Advanced Research Projects Agency. We are inviting you to participate in this research project because you are a college student living in certain residence halls or enrolled in a particular Living Learning Community. The purpose of this research project is to identify biomarkers (measurable substances within a person) that can indicate which individuals, when exposed to viruses and bacteria that cause Acute Respiratory Infections (ARI), are likely to become contagious and spread the ARI to others, and to improve our understanding of how ARI are transmitted so that we may better prepare to mitigate or prevent future epidemics and pandemics of influenza and other ARIs.

Review Consent Form

You can review the consent form you signed earlier in the app by clicking on “View Consent Form”. Rotate your phone before you click it to see it better.
